Job description

You are an outstanding student who likes to work across disciplines? You are passionate about human interaction, development and digital change in a high-tech environment? Or you are a scientific thinker, who is fascinated by technology, but also interested in strategic, financial and market aspects of technology? Do you want to develop and help implement a vision how the digital future of a strategy, M&A function looks like in 2030 – and chart a course for the team? Do you want to become a full-fledged member of the diverse team of Infineon Strategy and M&A interns, mostly engineers and business graduates? Then this internship is a great opportunity for you! It’s a unique chance and will take an exceptional individual to achieve results.

For this opportunity, we expect you to work directly with senior leadership to detail the digital transformation and change the concept for the global Strategy and M&A team.

Depending on your skills and performance, you may in addition be asked to:

- Own and drive project management of your own work package.
- Create presentations for key decision-makers within Infineon and discuss project results with people development, digitalization and change experts.
- Develop and establish new advanced concepts and methodologies for the workplace of the future.

The minimum duration of the internship is 4 months.

Profile

You are best equipped for this task, if you:

- Are currently studying electrical engineering, business administration, computer sciences or something similar in terms 4-8 (late Bachelor or early Master) and you are amongst the very best.
- Have a natural interest in strategic business topics and digitalization of our work environment.
- Have already gained knowledge or relevant working experience in semiconductor, human resources and/or change management. Knowledge in advanced analytics, machine learning, or natural language processing is a plus.
- Impress with a structured way of thinking and working.
- Are a team player and show strong interpersonal skills.
- Feel comfortable to discuss and present results within the team and to key stakeholders using PowerPoint – challenge and be challenged.
- Have a very good command of English. German is a plus.
